Detailed Rationale

The ratings assigned to the bank facilities of Bharat Insulation Company India Private Limited (BICIPL) derive strength from long track record and extensive experienced of promoter in the cable industry and stable revenue growth. The rating is however constrained on account of thin profitability margins, moderate capital structure and elongated working capital cycle.

Key Rating Sensitivities:

Upward Factors

- Significant & sustained increase in scale of operations with improvement in profitability and debt protection metrics.
- Improvement in working capital cycle.

Downward Factors

- Substantial decline in the revenue and profitability leading to sustained decline in the debt protection metrics and/or liquidity profile.
- Deterioration in working capital cycle.

List of Key Rating Drivers with Detailed Description

A. Key Rating Strengths

Long track record and extensive experienced of promoter in the cable industry

BICIPL has a long track record of operations of more than five decades in manufacturing of winding and welding copper wires industry. BICIPL is promoted by two promotors Mr. Dhiren Mehta and Mr. Sanat Mehta. Mr. Dhiren Mehta having more than four decades of experience in the wire and cables industry while Mr. Sanat Mehta having decades of experience in the same line of business. The two promoters' extensive experience has aided in their ability to build relationships with suppliers and clients and to obtain repeat business. They are well supported by a team of qualified and experienced professionals.

Stable revenue growth

BICIPL's revenue has increased at CAGR of 11.87% through FY20-FY23 to Rs. 364.27 crore in FY23 (prov.) this growth is driven by increase in volume as well as realisations. BICIPL's volume has shown improvement driven by repetitive orders from its existing customers, further year-on-year basis the total operating income has improved by ~9% to Rs.364.27 crore in FY23 (Prov.) {vis-à-vis Rs.335.33 crore in FY22}.

B. Key Rating Weaknesses

Thin Profitability margins

BICIPL's EBITDA margin has declined year-over-year basis from FY20 to FY22. In FY20, the EBITDA margin was 5.93% it declined to 3.75% in FY22 due to an increase in copper prices. In FY23 despite an increase of copper prices EBITDA margin has marginally improved to 3.84%. Net profit margin improved but remained low at 0.86% in FY23 as compared to 0.45% in FY22, due to marginal increase in gross profit.

Moderate Capital structure

BICIPL's capital structure marked by overall gearing ratio and TOL/TNW has remained moderate at 2.41x and 2.72x as of March 31, 2023, (prov.) respectively, due to higher utilization of working capital limits as on balance sheet date. ICSR and DSCR of the company remained comfortable at 2.14x and 1.99x respectively as a result of improvement in scale of operation and profitability margins.
