Detailed Rationale

The ratings assigned to the bank facilities of Madhur Iron & Steel (I) Pvt Ltd (MISIPL) considers its experienced promoters with more than three decades of experience and its reputed clientele base. The ratings also positively note its healthy business risk profile marked by sustained improvement in operating income and profitability coupled with moderate financial risk profile marked by moderate capital structure and satisfactory debt coverage indicators in FY23. However, these rating strengths are partially offset by susceptibility of profitability to fluctuation in raw material prices, working capital intensive nature of operations and exposure to cyclicalities in the steel industry.

- Growth in scale of business with improvement in profitability metrics thereby leading to overall improvement in cash accruals on a sustained basis.
- Sustenance of the capital structure with improvement in overall gearing ratio on a sustained basis

Downward Factors

- Decline in revenue and profitability leading to deterioration in gross cash accruals and debt protection metrics on a sustained basis.

Press Release

- Moderation in overall gearing ratio to over 2x and/or moderation in interest coverage ratio to below 2x
- Moderation in liquidity position marked by elongation in operating cycle

Key Rating Weaknesses

Susceptibility of profitability to fluctuation in raw material prices

The price of steel is volatile in nature and the same exposes the company to input price fluctuation risk. Furthermore, billet prices are showing an increasing trend. Hence, the margins are susceptible to the volatility in the input prices.

Working capital intensive nature of operations

The operation of the company is working capital intensive in nature with operating cycle of 62 days in FY23 as compared to 51 days in FY22 and high utilisation in its working capital borrowing limit. The elongation in working capital cycle is due to higher inventory of 88 days in FY23 as compared to 68 days in FY22. The company has order-based model and as on March 31, 2023, it has finished goods in its books, which has reduced in April 2023 after dispatch of order. The receivable days remains between 3-9 days in the past three fiscals ending in FY23 which supports the liquidity profile of the company.

Exposure to cyclicity in the steel industry

The domestic steel industry is cyclical in nature and is likely to impact the cash flows of the steel players, including MISIPL. The steel industry is cyclical in nature and witnessed prolonged periods where it faced a downturn due to excess capacity leading to a downtrend in the prices.
