

## Press Release

### United Polyfab Gujarat Limited

August 29, 2024

#### Ratings

Instrument / Facility	Amount (Rs. crore)	Current Ratings	Previous Ratings	Rating Action	<a href="#">Complexity Indicator</a>
Long Term Bank Facilities	105.36 (enhanced from 83.76)	IVR BBB-/ Stable (IVR triple B minus with Stable outlook)	IVR BBB-/ Stable (IVR triple B minus with Stable outlook)	Assigned/ Reaffirmed	Simple
Short Term Bank Facility	4.50	IVR A3 (IVR A three)	IVR A3 (IVR A three)	Reaffirmed	Simple
<b>Total</b>	<b>109.86</b> <b>(One hundred nine crore and eighty six lakh only)</b>				

Details of Facilities/Instruments are in Annexure 1. Facility wise lender details are at Annexure 2. Detailed explanation of covenants is at Annexure 3.

#### Detailed Rationale

Infomerics has reaffirmed the ratings assigned to the existing bank facilities and assigned ratings to the enhanced bank facilities of United Polyfab Gujarat Limited (UPGL) on the back of strengths derived from the extensive experience of promoters in textile industry, moderate capital structure and debt protection parameters, increase in topline and set up of captive power plant and easy availability of raw material. However, the ratings are constrained on account of the thin profit margin, susceptibility of profitability to fluctuations in key raw material prices and exposure to intense competition.

#### Key Rating Sensitivities:

##### Upward Factors

- Sustained growth in scale of business with improvement in profitability metrics thereby leading to overall improvement in cash accruals on a sustained basis.
- Improvement in the capital structure and debt protection metrics
- Effective working capital management with improvement in operating cycle and liquidity.

##### Downward Factors

## Press Release

- Dip in operating income and/or profitability impacting the debt coverage indicators.
- Deterioration in the capital structure with increase in overall gearing ratio and deterioration in debt protection metrics.
- Withdrawal of subordinated unsecured loans and/or moderation in the capital structure with deterioration in overall gearing.

### List of Key Rating Drivers with Detailed Description

#### Key Rating Strengths

- **Extensive experience of promoters in textile industry**

The Mittal family, promoters of the company have been in the textile business for almost 20 years. Extensive business experience of the promoters has enabled the establishment of healthy relationship with suppliers and dealers, which helps in smooth functioning of business.

- **Moderate capital structure and debt protection parameters**

Total debt of the company declined to Rs. 106.09 crore as on March 31, 2023, from Rs. 113.37 crore as on March 31, 2022, due to decline in long term debt, bank borrowings and unsecured loan. The total debt increased to Rs. 117.49 crore as on March 31, 2024, due to addition of term loan on account of wind mill project and increase in term loan for working capital. The company's adjusted net worth increased to Rs. 87.63 crore as on March 31, 2024, compared with Rs. 71.69 crore as on March 31, 2023, and Rs. 63.11 crore, due to shares issued which bought in funds of Rs. 12.4 crore along with accretion of profit to equity. To arrive at the net worth, Infomerics has considered Rs. 8.00 crore of unsecured loans from promoters/ directors as quasi equity as the same is subordinated to the bank facilities. Considering the quasi equity the long-term debt equity ratio stood at 0.98 times as on March 31<sup>st</sup>, 2024, as compared to 1.25 times as on March 31, 2023 (1.52 times as on March 31, 2022). The overall gearing ratio improved to 1.34 times as on March 31<sup>st</sup>, 2024, as compared to 1.48 times as on March 31, 2023 (1.80 times as on March 31, 2022). TOL/TNW was 1.77x on March 31, 2024, as compared to 1.76 times in as on March 31, 2023. Interest coverage ratio was 3.47 times in FY24 (refers to period between April 1, 2023 to March 31, 2024), compared with 3.25 times in FY23 (refers to period between April 1, 2022 to March 31, 2023), and DSCR deteriorated to 1.02 times in FY24 compared with 1.04 times in FY23.

- **Increase in topline and set up of captive power plant**

## Press Release

The company reported TOI of Rs. 661.07 crore in FY22 (refers to period between April 1, 2021 to March 31, 2022), Rs. 652.60 crore in FY23 and Rs. 908.48 crore in FY24. TOI increased by 39.21% y-o-y in FY24. The increase is on account of increase in sales of yarn. Going forward, Infomerics believes the profit of the company is likely to increase given that the company has set up a wind mill project of 2.7 MW capacity in FY24 which will be operational by July 2024 end/August 2024 beginning. In Q1FY25 the company reported PAT of Rs. 3.77 crore up 14.59% y-o-y. Further, the company is in the process of setting up another 10 MW solar power plant. The 10MW solar power plant is yet to be set up but it is expected to get started by end of July 2024 and will be completed by November 2024.

- **Easy availability of raw material**

The company has easy access to raw materials as its manufacturing plant is located in Ahmedabad (Gujarat), which is cotton growing belt of India. Favourable location of the plant also enables the company to save on logistics costs.

### Key Rating Weaknesses

- **Thin profit margin**

Historically, the profit margin of the company has remained thin. EBIDTA margin declined to 3.45% in FY24 and 4.38% in FY23 from 4.93% in FY22, as due to low value addition. Likewise PAT margin declined from 1.42% in FY22, 0.84% in FY23 and to 0.73% in FY24. Going forward the PAT margins are likely to improve primarily due to the usage of captive power which will save power cost drastically.

- **Profitability susceptible to fluctuations in key raw material prices**

The company's profitability is vulnerable to sharp fluctuations in raw material prices, which affects sales realisations. Cotton prices have been volatile in recent years and thus its profitability remains susceptible to any adverse movement in cotton and yarn prices. However, the risk is mitigated to an extent on account of order-backed raw material procurement policy.

- **Exposure to intense competition**

The spinning industry is highly fragmented and competitive with the presence of large number of organised and unorganised players. Intense industry competition coupled with

## Press Release

commoditised nature of the products limits the company's pricing flexibility and bargaining power.

**Analytical Approach:** Standalone

### **Liquidity – Adequate**

The liquidity position of the company is adequate marked by its expected gross cash accruals as against debt obligations from FY25 to FY27. Moreover, the company's bank limits are utilized to the extent of ~23% on an average for the twelve months period ended June 2024, giving sufficient liquidity cushion.

### **About the company**

Incorporated in November 2010, United Polyfab Gujarat Limited is engaged in the spinning of cotton yarn. Its manufacturing unit is located in Timba, Dascroi, Ahmedabad. The company has an installed yarn spinning capacity of 40,000 spinning spindles. The company is listed on NSE. The company has 1 MW of solar power plant at its factory site, and it implemented a wind mill project of 2.7 MW capacity in FY24
