

## Press Release

**Hind Energy and Coal Benefication (India) Limited**

**November 26, 2020**

### Rating

Sl. No.	Instrument/Facility	Amount (Rs. Crore)	Rating	Rating Action
1	Long Term Bank Facility	20.00	IVR A/ Positive (IVR Single A with Positive Outlook)	Assigned
	<b>Total</b>	<b>20.00</b> (Rupees Twenty Crore Only)		

**Details of Facilities are in Annexure 1.**

### Detailed Rationale

The rating assigned to the bank facilities of Hind Energy and Coal Benefication (India) Limited (HECBL) factors in the established track record of the company and longstanding experience of the promoters, its reputed clientele, proximity of operations to South Eastern Coalfields Limited (SECL) mines, its strong logistic arrangements and high entry barriers in the sector. The rating also notes healthy financial performance of the company marked by improvement in its operating income & profit margin coupled with its comfortable capital structure. However, these rating strengths are partially offset by its limited bargaining power against established customers, presence in a regulated sector, investment in real estate and other business arms exposure to end user sector challenges and working capital intensive nature of its operations. The outlook remains positive with expected improvement in the financial risk profile of the company driven by its healthy order book.

### Key Rating Sensitivities:

#### Upward Factors:

- Substantial and sustained growth in operating income, operating margin and cash accrual
- Improvement in working capital management with improvement in liquidity
- Improvement in capital structure and debt protection metrics on sustained basis

#### Downward Factors:

- Moderation in operating income and cash accrual impacting the debt protection metrics on a sustained basis

## Press Release

- Stretch in the working capital cycle driven by stretch in receivables, or sizeable capital expenditure weakens the financial risk profile, particularly liquidity.
- Any unplanned capex and /or deterioration in overall gearing to over 1.0x

### List of Key Rating Drivers with Detailed Description

#### Key Rating Strengths

- **Established track record and longstanding experience of the promoters**

HECBL has an established operational track record in the coal Beneficiation, coal handling, coal transportation and in trading of coal and developed an established healthy relationship with its customers and suppliers. The Hind Group incorporated in 2005 with the incorporation of its flagship company, HECBL. Ever since, the group has expanded their operations and is currently engaged in the business of coal washing, coal liaisoning, coal transportation and coal trading. The overall affairs of the group are managed by the promoters, Mr Pawan Kumar Agrawal, Mr. Rajeev Agrawal, Mr. Sanjay Agrawal and Mr. Satish Kumar Agrawal having experience of around three decades. All of them together look after the overall functioning of the group.

- **Reputed clientele**

From operations ranging over a decade, HECBL has established itself in the coal industry as one of the prominent private sector players by working for reputed clients in the private and public sector such as Rajasthan Rajya Vidyut Utpadan Nigam Limited, Vedanta Limited, Gujarat State Electricity Corporation Limited, Nabha Power Limited and TATA Power Company Limited among others. For power generation company's Beneficiation is a very important process as it saves lots of cost for then and increase the efficiency of boilers. Hence HECBL holds an important position for its customers engaged in power generation.

- **High entry barriers**

The coal Beneficiation business in India is highly regulated and falls under the purview of Ministry of Coal, Government of India as well as related to regulations made by Ministry of Environment, Forest and Climate Change, Government of India. Such high level of regulation from multiple government authorities creates entry barriers for new players. This provides an advantage to the existing players by keeping the competition low. HECBL, currently has the second largest coal washery in India. With limited number of companies present in the coal

## Press Release

washeries business, Infomerics believes the existing players in the market will benefit from its established presence.

- **Proximity of operations to South Eastern Coalfields Limited (SECL) mines**

HECBL purchases various grades of coal by e-auction through South Eastern Coalfields Limited (SECL) held by MSTC or Metal Junction. Clients having a linkage with South Eastern Coalfields Limited (SECL) submit an authorization letter to SECL allowing group to lift coal from the mines of SECL on behalf of them and wash the coal.

- **Strong logistic arrangements**

Cost and efficiency of logistical expenses play a key role in the coal Beneficiation business. The group has continuously invested and built their own logistical infrastructure for optimum utilization of available capacity. HECBL has two railway sidings used to transport coal to the coal washery. Having an owned railway siding is beneficial to the group as it provides an opportunity for delivery of coal in a time bound manner and save major cost of logistics thereby improving its operating margins. Further, HECBL also owns and leases a large fleet of 300 long vehicles comprising of trailers and pay loaders for coal transportation throughout the country.

- **Healthy financial performance marked by improvement in operating income and profit margin**

The total operating income of the HECBL witnessed an erratic trend over the last four years FY17- FY20 (Provisional). The same improved by around 13% in FY20 provisional to Rs.536.00 crore from Rs.472.95 crore in FY19 driven by higher beneficiation and the resultant improvement in rejects availability, which led to higher revenue from the sale of coal. The HECBL's EBITDA level and margin increased from Rs.75.38 crore and 15.94% in FY19 to Rs.123.74 crore and 23.09% in FY20 (provisional) respectively due to better fixed cost absorption across segments coupled with improvement in realisation from the sale of coal rejects. The PAT margin moved in line with the EBITDA margin and witnessed steady improvement in FY20. During H1FY21, the company witnessed downturn in its revenue and has achieved a revenue of Rs.80 crore. This is because, the group is in coal consumption industry which is directly linked to Power Industry. Because of world-wide pandemic and lockdown, all the factories were closed or were running in half of their capacity, leading to lower power consumption and hence affecting coal consumption.

- **Comfortable capital structure and debt protection metrics**

## Press Release

HECBL has a comfortable capital structure on the back of its satisfactory net worth base of Rs.210.59 crore as on March 31, 2020 (after adjusting for all the investments and loans and advance in group companies). The overall gearing ratio of HECBL remains comfortable and stood at 0.64 on Mar.31, 2019 vis-a-vis 0.58x as on March 31, 2018. However, as per FY20 provisional, overall gearing of HECBL has improved to 0.35x with accretion of profit to reserves and scheduled repayment of term loans. Total indebtedness of the HECBL as reflected by the TOL/TNW stood satisfactory at 0.55x as on March 31, 2020 (Prov.). Debt protection parameters marked by interest coverage ratio and Total Debt to GCA remained comfortable at 8.82x and 2.07 years in FY19. As per FY20 (Provisional), HECBL reported interest coverage of 12.95x and Total debt to GCA of 0.83 years. Infomerics expects the capital structure of the company will continue to remain strong with health debt protection metrics.

### **Key Rating Weaknesses**

- **Limited bargaining power against established customers**

HECBL primarily supplies coal to power and cement companies with limited bargaining power of the company against established customers.

- **Presence in regulated sector and exposure to end user sector challenges**

Exposure to various government regulations restricts the business risk profile of HECBL's to a large extent. Further, the end user companies are generally involved in power generation, cement manufacturing and steel and metal plants. The performance of these sectors are highly interlinked to economic cycles, hence any moderation in the financial risk profile of these companies may affect the performance of the HECBL.

- **Exposure to real estate companies**

HECBL has exposure to real estate business through equity or preference share investment in various associate companies.

- **Working capital intensive nature of operations**

HECBL's operation is working capital intensive in nature as it has to offer credit period for around 40-60 days to its customer and has a policy to maintain inventory of about 30 to 40 days. While the company has to make upfront payment to SECL, it gets a credit period of around 12-15 days for coal procured from local players, which reduces the working capital requirement to a certain extent. However, the average cash credit utilisation remained low at ~ 36.85% during the 12 months ended September, 2020 indicating a sufficient liquidity buffer.

**About the company**

Bilaspur-based HECBL was incorporated in 2005 by Mr. Pawan Kumar Agrawal, Mr. Rajeev Agrawal, Mr. Sanjay Agrawal and Mr. Satish Kumar Agrawal as a private limited company and later the constitution was changed to a limited company in 2010. It beneficiates non-coking coal based on Gross Calorific Value (GCV) requirement of the customers like power generating companies, steel and cement companies. Beside coal beneficiation the company also trades in reject coal, (by-product of Coal Beneficiation process). HECBL currently has coal Beneficiation capacity of 6.48 MTPA. To cater various other coal mines the promoters of HECBL have floated various other companies in nearby coal mining areas engaged in the same line of operation. Over the years, the promoters made organic and inorganic expansion both through association with other players operating in the same segment. At present HECBL has established its own coal washing facilities and railway sidings at various important locations near coal mines. HECBL is the flagship company of the Hind group which is one of the largest players in the coal beneficiation sector.
