Detailed Rationale

The rating of Medec Dragon Private Limited (MDPL) draws comfort from extensive experience of the promoters in pharma industry, conservative capital structure and improvement in financial performance over the past two fiscals. The rating also positively notes its asset light model of operations which enables the company to scale up operations without incurring significant capital expenditure. However, these rating strengths remain constrained due to high geographical and customer concentration risk. The rating also considers high receivables and susceptibility of operations to regulatory restrictions.

Key Rating Sensitivities

Upward Factors:

- Significant growth in scale of business with improvement in profitability metrics thereby leading to overall improvement in cash accruals on a sustained basis
- Effective working capital management with improvement in operating cycle and liquidity

Downward Factors:

- Decline in operating income and/or profitability on sustained basis
- Deterioration in the capital structure
- Elongation in the operating cycle impacting the liquidity

List of Key Rating Drivers with Detailed Description

Key Rating Strengths

- **Extensive experience of promoters**

The promoter, Dr Suresh Chhaberia, has experience of over three decades in pharmaceutical industry. He has worked with companies in UAE & Africa and his long presence in Pharma industry has helped in building strong supplier and customer network. Besides, he is ably supported by well experienced management team which enables the company to grow and penetrate newer markets globally.

- **Asset light model of operations**

MDPL follows asset-light model of operations and outsources its entire manufacturing to third parties. This enables the company to scale-up its operations without incurring significant capital expenditure and offers higher flexibility and lower overhead cost.

- **Conservative capital structure**

The Company has a healthy capital structure with no debt on its books as on March 31, 2020.

- **Improved financial performance**

The total operating income of the Company has increased from Rs.~287 Crore in FY19 to Rs.~304 Crore in FY20, registering a growth of ~6%. The EBITDA margin also improved from 6.89% in FY19 to 7.08% in FY20. The PAT margin remained stable ~2.95% in FY20. During Q1FY21, the company has achieved a revenue of ~Rs. 94 crore. Further, MDPL's export order book as on July 25, 2020 stood at Rs.182 crore indicating a steady near term revenue visibility.

Key Rating Weakness

- **Concentration risk**

The company's major sales are exports, mainly in semi-regulated/unregulated markets. Further, the company is exposed to increased customer concentration risk with the top five customers accounting for ~56% of the total revenues in FY20. MDPL also remains exposed to geographical concentration risk with major share of revenues coming from the Middle East

region. However, the promoters have strong relationship with the counter parties with good understanding of the Middle East market which imparts comfort.

- **Operations exposed to regulatory restrictions**

The operations remain susceptible to regulatory restrictions in terms of pricing caps and product approvals in export destinations. With increasing focus on exports, timely product approval, in various semi-regulated markets, remains crucial for the growth of exports going forward.

- **High receivables**

The debtor days remained high in FY20, owing to the high credit period offered to the customers. It stood at 117 days as on March 31, 2020 (62 days as on March 31, 2019). However, as on March 31, 2020, there was no receivables above 6 months. The company's exports are not LC backed, but are covered under insurance.
