

## Press Release

### Shivalik Engineering Industries Limited

July 24, 2020

#### Ratings

Instrument / Facility	Amount (Rs. Crore)	Ratings	Rating Action
Long Term Fund Based Bank Facilities – Cash Credit	25.90	IVR BBB - /Stable (IVR Triple B Minus with Stable Outlook)	Assigned
Long Term Fund Based Bank Facilities – Term Loan	34.10	IVR BBB - /Stable (IVR Triple B Minus with Stable Outlook)	Assigned
<b>Total</b>	<b>60.00</b>		

Details of Facilities are in Annexure 1

#### Detailed Rationale

The aforesaid rating assigned to the bank facility of Shivalik Engineering Industries Limited (SEIL) derives comfort from being a part of the Shivalik group under an experienced promoter, established relationship with its reputed clientele and its locational advantage of being situated in the state of Chhattisgarh. The rating also considers Shivalik group's satisfactory operating profitability with comfortable financial risk profile marked by satisfactory capital structure and healthy debt protection metrics aided by minimum near term debt repayment obligation and healthy order book position indicating a near to medium term revenue visibility. However, these rating strengths are partially offset by susceptibility of profitability to volatility in raw material prices, exposure to client concentration risk, high competition and cyclical nature in the auto (commercial vehicle) component segment. Further, the rating also considers moderation in operating performance in FY20 and its working capital intensive nature of operations.

#### Key Rating Sensitivities:

##### Upward factors

- Substantial & sustained improvement in revenue and/or profitability leading to improvement in debt protection metrics
- Sustenance of the capital structure
- Improvement in liquidity and/or improvement in average working capital limit utilisation to below 90% on a sustained basis

## Press Release

### **Downward factors**

- More than expected decline in revenue and/or profitability leading to deterioration in debt protection metrics.
- Deterioration in the capital structure on a sustained basis
- Deterioration in liquidity with sharp increase in the operating cycle

### **List of Key Rating Drivers with Detailed Description**

#### **Key Rating Strengths**

##### **Experienced promoters**

The promoters of the group Mr. Giriraj Singhanian and Mr. Vishal Sharma has extensive experience in the industry of more than a decade. With long and established presence in the industry the promoters have established a strong network with suppliers and customers. Further, the promoters are well supported by a team of experienced professionals, having over a two decade of experience in the segment, to look after the overall management. The day-to-day operations of the company are looked after by the senior management having considerable experience with technological background under the guidance of the promoters

##### **Reputed Clientele**

The Shivalik group caters majority of its revenue from original Equipment's Manufacturers (OEM's) of large automobile companies and has developed an established & longstanding relationships with its customers. OEMs in commercial vehicles and tractors contribute over ~80% of the group revenue over the years. The clientele of the group includes reputed players like, TML Drivelines Ltd, Ashok Leyland Ltd, VE Commercial Vehicles Ltd, Patil Rail Infrastructure Pvt Ltd, KIC, Timken India Ltd, International Tractor Ltd, Escorts Ltd, Automotive Axles Ltd, and Tractor and Farm Equipment Ltd. Strong association with these original equipment manufacturers (OEMs), results in increasing and repeat order flow.

##### **Locational advantage**

Steel and power are the major raw material of the group. Located in the state of Chhattisgarh the group is enjoying easy access to steel as the state is one of the major steel hub in India. Besides, Chhattisgarh is a power surplus state and power is available at a cheap rate. Hence, the group is enjoying competitive edge being located in Chhattisgarh.

## Press Release

### **Stable financial performance with satisfactory profitability albeit moderation expected in FY20**

The group's topline was on a steady increase with a CAGR of ~ 41% in the last three years ended FY19 on the back of steady and increasing order flow given the promoters' strong relationships with its customers. The margins of the group also remained satisfactory and range bound at ~13%-14% over the last three fiscals ended in FY19. The PAT margin of the group also remained healthy witnessed an improving trend. However, the total operating income of the group is estimated to dampened by ~36% in FY20 amidst economic slowdown leading to subdued demand for CV and tractors resulting in contraction in sales. With estimated moderation in total operating income, the profitability is also expected to dampened to an extent with deterioration in profit margins due to lower absorption of fixed costs attributable to contraction in capacity utilisation and moderation in average sales realizations. However, despite moderation, the margins are estimated to remain moderate with the EBITDA margin at ~11% and the PAT margin at ~1.12% in FY20.

### **Comfortable financial risk profile marked by satisfactory capital structure and healthy debt protection metrics**

The financial risk profile of the group remained comfortable over the years marked by its comfortable gearing and healthy debt protection metrics. Further, the total indebtedness of the group also remained comfortable with a TOL/TNW at 1.63x as on March 31,2019. Moreover, considering the unsecured loans as the part of net worth the TOL/ANW remained at 1.47x as on March 31,2019. The debt protection metrics of the group also remained comfortable and healthy supported by its strong cash accruals marked by its strong interest coverage ratio over the years. However, even after estimated moderation in the profitability in FY20, the capital structure and the debt protection metrics are estimated to remain comfortable with TOL/ ANW at 1.19x as on March 31,2020 and interest coverage at 2.04x.

### **Healthy order book position indicating a near to medium term revenue visibility**

The shivalik group has a strong order book comprising orders from leading OEMs of the country of ~Rs.550 crore as on May 30, 2020 (~2.5x of its FY20 estimated revenue). The

## Press Release

orders are to be executed in the next 1-2 fiscals which indicates a strong revenue visibility in the near to medium term.

### **Key Rating Weaknesses**

#### **Exposure to volatility in raw material prices**

The major raw material required for the group is steel and steel related items, prices of which are volatile in nature. The company procures these raw materials at prevailing market prices. However, though some of its contracts with OEM'S has price revision clause to protect its margins to an extent, the overall profitability largely remains susceptible to fluctuations in its raw material prices.

#### **Client concentration risk**

The group is vulnerable to client concentration risk as the top 6 customers of the group account for ~90% of the sales indicating a concentrated client base. However, group is in the process of diversifying and increasing its customer base into various sectors including commercial vehicles, railways and metro, tractors, water works and transmission lines.

#### **High competition and cyclicity in the cyclicity in the auto (commercial vehicle) component segment**

The automobile industry is cyclical in nature and automotive component suppliers' sales and tractors' segment sales are directly linked to sales of auto OEMs. Furthermore, the auto-ancillary industry is competitive with the presence of a large number of players in the organized as well as unorganized sector. While the organized segment primarily caters to the OEM segment, the unorganized segment mainly caters to the replacement market and to tier II and III suppliers. However, established position of the group and strong relationship with the OEMS given a competitive advantage.

#### **Working capital intensive nature of operations**

Being in auto ancillary industry, the operations of the group are working capital intensive mainly due to its moderate receivables and inventory. The Shivalik group extends credit of around 30-60 days to its customers and maintained average finished goods inventory of

## Press Release

around 60 days, while credit received has been around 30 days. Reliance on working capital borrowings has, therefore, been high with ~96% working capital limit utilisation in the past 12 months ended May, 2020.

### **Analytical Approach: Consolidated**

For arriving at the rating, Infomerics has combined the financial risk profiles of Shivalik Power & Steel Private Limited and Shivalik Engineering Industries Limited together referred to as the Shivalik group as these entities are running under a common management, have strong operational and financial linkages and cash flow fungibility. Shivalik Engineering Industries Pvt. Ltd has also provided corporate guarantee to Shivalik Power & Steel Private Limited. The list of the companies is in **Annexure 2**.

### **Applicable Criteria:**

Rating Methodology for Manufacturing Companies

Financial Ratios & Interpretation (Non-financial Sector)

### **Liquidity - Adequate**

The liquidity position of the group is expected to remain adequate in the near term on the back of its healthy cash generation ability. The group has estimated to generate a cash accrual of ~Rs.11 crore in FY20 and expected to generate cash accruals in the range of ~Rs.18-20 crore during FY21-23 driven by its healthy order book as against its debt repayment of ~Rs.10 crore during the aforesaid period. However, the liquidity position of the group is restricted due to its working capital intensive nature of operations and high dependence on working capital borrowings leaving a limited liquidity buffer from its working capital limits.

### **About the Company**

Shivalik Engineering Industries Limited (SEIL) incorporated in 2011 is based out of Chhattisgarh. In 2015, the company commenced production and started manufacturing iron casting components for automobiles, railways and engineering industry at its foundry unit with an installed capacity of 30,000 MTPA located in Hathkhoj, Industrial Estate, Bhilai, Chhattisgarh.

## Press Release
