

## Press Release

### Hindustan Coils Limited

December 31, 2020

#### Ratings

Instrument / Facility	Amount (Rs. crore)	Ratings	Rating Action
Long Term Bank Facilities – Cash Credit	30.00 (enhanced from 20.00)	IVR BBB+ / Stable Outlook (IVR Triple B Plus with Stable Outlook)	Re-affirmed
Long Term Bank Facilities – Term Loan	26.36 *	IVR BBB+ / Stable Outlook (IVR Triple B Plus with Stable Outlook)	Re-affirmed
<b>Total</b>	<b>56.36</b> <b>(Fifty-six crore thirty- six lakh only)</b>		

Details of Facilities are in Annexure 1

#### Detailed Rationale

The reaffirmation of the ratings assigned to the bank facilities of Hindustan Coils Limited (HCL) continues to derive comfort from the parentage of the Agrasen group and strong support from group synergy, locational advantage of the plant with group's semi-integrated operations, agreement with Kamdhenu Limited (KL) along with established relationship of the Agrasen Group with KL. The ratings also continue to consider comfortable capital structure of the group albeit moderation in the debt protection metrics in FY20. However, these rating strengths are constrained due to volatility in raw material prices, highly competitive & fragmented nature of the industry and cyclical nature in the steel industry. The ratings also note moderation in its financial performance in FY20 with contraction in its total operating income and profitability mainly due to sharp fall in average sales realisation of steel products during the fiscal.

#### Key Rating Sensitivities:

##### Upward Factors

- Growth in scale of operation with continuance of agreement with KL and improvement in profitability with EBITDA margin over 6%
- Improvement in the capital structure and/or improvement in the debt protection metrics

## Press Release

- Efficient working capital management with improvement in its average cash credit utilization to below 90% on a sustained basis

### **Downward Factors**

- Dip in operating income and/or profitability impacting the debt coverage indicators.
- Deterioration in the capital structure with moderation in the overall gearing to more than 1.00x

### **Detailed Description of Key Rating Drivers**

#### **Key Rating Strengths**

#### **Parentage of the Agrasen group and strong support from group synergy**

The Agrasen group is founded by the Agrawal family of Raipur, Chhattisgarh. The group has vast experience in the steel and steel products manufacturing and trading segment through various companies under its fold. The Agrawal family started their business operations with trading of steel products and gradually ventured in manufacturing operations in 2002 and consequently have more than one and half decades of experience in manufacturing of steel products. Currently, the Agrasen group has two business verticals – Trading and Manufacturing. Under manufacturing vertical, the group is engaged in manufacturing of steel wires, Ms Ingot, billets and steel rolled products. Under trading vertical the group is engaged in trading of various steel products. Further, the trading companies of the Agrasen Group, are empaneled vendors of large companies and supplies varied grades of iron and steel products.

#### **Locational advantage**

The manufacturing facility of M/s Ispat India, Agrawal Channel Mills Private Limited (ACMPL), Devi Iron & Power Private Limited (DIPPL), Hindustan Coils Limited (HCL), Mahamaya Spong Iron Private Limited (MSIPL) and M/s. Om Sponge (OS) is located in Raipur, Chhattisgarh which is known as steel hub and is in close proximity to various manufacturers of sponge iron, pig iron and iron scrap, the main raw materials for manufacturing of its products. Accordingly, availability and sourcing of raw materials is not an issue.

#### **Semi-integrated nature of operation of the group**

## Press Release

The operations of the Agrasen group are semi-integrated with manufacturing facilities of both intermediate products like sponge iron, billets and end products like TMT bars, wires, structural, coils, tubes. Further, around 70-75% of sponge iron produced by DIPPL is procured by ACMPL, HCL and II. Moreover, under DIPPL, the group has access to an iron ore mine with around 8-10 crore tonnes reserve spread over an area of about 400 Hectare. However, the mining operation is expected to start soon and pending for regulatory clearances.

### **Agreement with Kamdhenu Limited (KL) along with established relationship of the Agrasen Group with KL**

The Agrasen group has an established relationship with KL, as the group is also manufacturing MS Angle, channels in Agrawal Channel Mills Pvt. Ltd and steel wires in Hindusthan Coils Ltd under the brand "Kamdhenu" under respective franchise agreements with KL. Besides, under M/s Ispat India the group has entered into a licensee agreement (last renewed on April 1,2019) with KL to market its products under the brand name of "Kamdhenu". The use of the established 'Kamdhenu' brand helps the firm to effectively market its products. In view of its established relationship with KL, the risk of non-renewal of contract is less.

### **Established marketing arrangements**

KL has 75 units under its brand with a network consisting of more than 11,500 dealers and distributors as on March 31, 2020. Further, the Agrasen group has its own established marketing arrangements with various steel products dealers on the back of its more than a decade long operation in the steel trading/manufacturing segment. The use of in-place marketing arrangements of KL and the Agrasen group provide business advantage to the to the group as a whole.

### **Comfortable capital structure, albeit moderation in debt protection parameters of the Group in FY20**

The financial risk profile of the Agrasen group remained comfortable marked by its satisfactory capital structure and healthy debt protection parameters. The overall gearing ratio of the group has improved from 0.67x as on March 31, 2019 to 0.64x as on March 31,2020 and remained comfortable (considering the subordinated unsecured loans from Directors and relatives as a part of adjusted net worth). The debt protection metrics though moderated, yet remained comfortable in FY20 with interest coverage ratio at 2.80x (5.40x in

## Press Release

FY19) and Total debt to GCA at 4.98x (2.62x in FY19) due to decline in overall profitability and margin in FY20. Total indebtedness of the group also continued to remain comfortable as reflected by TOL/ANW of 1.13x as on March 31, 2020.

On a standalone basis, the overall gearing ratio (excluding subordinated debt) of HCL improved from 1.33x as on March 31, 2019 to 1.17x as on March 31, 2020. Further, the interest coverage ratio remained healthy at 3.19x in FY20 (4.37x in FY19). Total indebtedness as indicated by TOL/ANW remained satisfactory at 1.90x as on March 31, 2020.

### **Key Rating Weaknesses**

#### **Decline in top line and profit margins of the Group in FY20**

The combined total operating income of the Agrasen Group declined from Rs.1349.76 crore in FY19 to Rs.1112.50 crore in FY20 mainly due to slowdown in the steel industry leading to decline in volume sales as well as decline in average sales realization of steel products at the same/similar level of production. Further, the decline in sales during the month of March, 2020 due to the outbreak of COVID-19 pandemic also fueled the deterioration in the top line of the group. With decline in the total operating income of the group, the EBITDA also reduced to Rs.53.36 crore in FY20 as compared to Rs.79.70 crore in FY19 resulting in decline in EBITDA margin from 5.91% in FY19 to 4.80% in FY20. The decline in EBITDA was also attributable to the fact that the decline in the steel prices during March, 2020 led to decline in the valuation of closing stock, the volumes of which was high since the company had stocked up its finished products along with iron ore and coal, its primary raw materials anticipating a slowdown in the availability of same due to the outbreak of COVID 19 pandemic. Decline in EBITDA and EBITDA margin also led to decline in PBT and PAT margin from 3.52% and 2.56% respectively in FY19 to 1.53% and 1.23% respectively in FY20. Combined GCA also declined from Rs.59.71 crore in FY19 to Rs.33.30 crore in FY20. During H1FY21, the group achieved a turnover of Rs.713.59 crore with PBT of Rs.19.58 crore. Further, with rising trend in steel prices, the group is expecting a healthy profit in the current fiscal (i.e., FY21).

On a standalone basis, the total operating income of HCL also declined from Rs.444.93 crore in FY19 to Rs.340.96 crore in FY20. The EBITDA also reduced from Rs.23.02 crore in

## Press Release

FY19 to Rs.17.94 crore in FY20. During H1FY21, the company achieved a top line of Rs.201.01 crore with PBT of Rs.4.37 crore.

### **Volatile input prices**

The cost of raw materials (i.e., sponge iron, pig iron and scrap) is the largest component of total cost of sales of steel products. Given that the prices of raw-materials are volatile in nature, the group's profitability is susceptible to fluctuation in raw-material prices. However, the Agrasen group had acquired controlling stake in DIPPL in FY17 which has a sponge iron manufacturing capacity of 90000MTPA. Further, the group has acquired MSIPL and OS having a sponge iron manufacturing capacity of 30000 MTPA each during FY19 which will also be expected to support its overall sponge iron requirement and boost its profitability going forward.

### **Highly competitive & fragmented nature of industry**

The spectrum of the steel industry in which the group operates is highly fragmented and competitive due to presence of numerous players in India owing to relatively low entry barriers. Hence, the players in the industry do not have pricing power and are exposed to the prices fixed by the industry giants.

### **Cyclicality in Steel Industry**

The steel industry is highly cyclical. Steel prices fluctuate based on macro-economic factors, including, amongst others, consumer confidence, employment rates, interest rates and inflation rates, general levels of infrastructure activities in the region of sale, etc. Adverse volatility in steel prices will have an adverse effect on the group's performance in view of its direct linkage to the fortunes of Steel industry. However, the outlook for the steel industry in the short to medium term appears to be good as the steel prices have hardened in the recent past, coupled with robust demand in the domestic market.

### **Analytical Approach:** Combined Approach

For arriving at the ratings, INFOMERICS analytical team has combined the financials of M/s Ispat India, Agrawal Channel Mills Private Limited, Devi Iron & Power Private Limited, Hindustan Coils Limited, Mahamaya Sponge Iron Private Limited and M/s Om Sponge referred as Agrasen Group as these companies are closely held entities with significant ownership & control by common promoter family and have strong operational and financial linkages. The list of companies is given in **Annexure 2**.

### **Applicable Criteria:**

## Press Release

Rating Methodology for Manufacturing Companies

Financial Ratios & Interpretation (Non- Financial Sector)

### **Liquidity –Adequate**

The liquidity position of the Agrasen group is expected to remain adequate characterized by sufficient cushion in its cash accruals vis-à-vis repayment obligations. Further, the group has been earning a comfortable level of GCA for the last few years and the same is expected to increase further with increase in scale of operations. The overall gearing of the group also remained comfortable at 0.64x as on March 31, 2020 indicating sufficient gearing headroom. However, the average cash credit utilization of the group remained on the higher side at ~91% for the past twelve months ended September, 2020 indicating a limited liquidity buffer.

### **About the Company**

Hindustan Coils Limited (HCL) was incorporated in 2015 by the Agrasen Group of Raipur for setting up a new project of 1,20,000 MTPA of rolling mill for manufacturing wire rods. The construction was started in February, 2016 and COD of the project was achieved in a phased – manner in FY18. HCL is managed and operated by the Agrawal family of Raipur having an experience of over 15 years in the steel industry. With integrated manufacturing facilities, the group has presence in sponge iron, billet and rolled products. Currently, the operations of the company are looked after by a seven-member Board of Directors, representing the members from the Agrawal family and their relatives having adequate experience in the sector.

### **About the Group**

The Agrasen group is founded by the Agrawal family of Raipur, Chhattisgarh. The group has vast experience in the manufacturing and trading of steel products through various companies under its fold. The Agrawal family started their business operations with trading of steel products and gradually ventured in manufacturing operations in 2002.
